DX news

Bouvet Island update

In consultation with our new transportation partner Aerovias DAP, we continue to refine our plans for our Bouvet DXpedition. We expect to depart from King George Island, in the South Shetlands Islands on January 13, 2018. Our transit time to Bouvet will be between 9 and 11 days depending on weather and the sea state.

Upon arrival at Bouvet we will conduct reconnaissance flights to the island and select a campsite free of crevasses. As weather permits we will begin building our radio city on the ice and secure our infrastructure. Then antennas will go up, our equipment will be assembled and we will begin non-stop operations. We are planning to be at Bouvet for 21 days, and depending on weather and other factors we hope to be on the air for 14-16 days. Then we will return to either King George Island or Punta Arenas, Chile. All in all, we will be away from civilization for 6-7 weeks.

See the entire press release here: <https://dx-world.net/3y0z-bouvet-2018/>

NCDXF newsletter

Latest Northern California DX Foundation [newsletter](#) is now available. Look on the page for 2017 and click on the box for **Spring**. Included in this issue:

OC-226 Mwokil Island update

The ship is delayed again leaving for Mokil island due to goods unloading and loading problem at the small Pohnpei port. We will arrive at Mokil island on June 30th. We will begin our operation around 9GMT on June 30th and finish our operation around 1GMT on July 2nd. Since our operation time is quite limited, we will be operating around the clock to work as many IOTA chasers around the world as possible. We will keep our fingers crossed that everything would be all right. No more nasty problems. *[V6J Team]*

DXCC

This week on HF

8Q, MALDIVES John, G4IRN is active as 8Q7RN from Kuredu Beach Resort, this until July 6. Operation most likely on 30, 20 and 17 meter. QSL via home call, Club Log and LoTW.
