3B7A St Brandon DXpedition -update

The propagation is sometimes capricious on the higher bands. This day was less intense especially on 10 and 12 with much weaker signals. During the coming night we will continue to operate on 17 and 20m until they close with NA, before switching to the lower bands. Last night was good on 160m with in particular with many JA at their SR. We will renew the same plan tonight.

This day we met the Mauritian coast guard stationed on Saint Brandon. The South island is not big but we had not yet had the time to venture to the other side. We were able to share with passion and share with him our experiences of Tromelin and Juan de Nova. Those expedition's conditions were quite similar in terms of fauna and flora. <https://dx-world.net/3b7a-st-brandon-dxpedition/>
