### **Last call by KH1/KH7Z Baker Island**

KH1/KH7Z is QRT. The last QSO was with JA2FJP on 80m FT8. We expect to be off island by 00:00 UTC 6 July for journey to Fiji. Our trip will take six days and cross the Dateline again. The team is very tired but proud of QSO totals, over 16,000 unique calls in the log, and successful deployment of new DXpedition Verizon of FT8 that showed over 6,000 unique calls in our log.

### **3Y0I, Bouvet Island –update**

Yes, we know. Lately, we haven't been updating our website recently, but we've been focused on securing crucial details of arrangements of our project recently. We have received a couple of questions regarding the way we're going to land at the island and why we dropped the heli way. The answer is simple: cost reduction and security measures. Once helicopter's cost doesn't bother us, we can stay around the island longer – waiting for the best suitable sea conditions to proceed with zodiac landing. by doing so, we also reduce any security risk, not to mention, the cost involved. We don't want to jeopardize the project by playing with the wrong cards, or rather – just one "heli card". <https://dx-world.net/3y0i-bouvet-island/>
