3D2AG/P Rotuma –update by Antoine 3D2AG January 6

About 5 more days to go before antennas are pulled down. Had some success on 160m FT8 last night, to east coast NA on FT8. On other bands, especially 20m, the FT8 situation is becoming quite hopeless. When I call on the advertised frequency of 14072 for instance, endless CQs result in no takers and is a time and fuel-wasting exercise, while calling on the main frequency (14074) is an impossibly difficult task finding a clear spot to both TX and RX using multiple streams. <https://dx-world.net/3d2ag-p-rotuma/>
